

Dagim Tadesse, PharmD, APh, BC-ADM, CDCES has started working at KMC Since January 2017 as a pharmacy director. Dr. Tadesse received his BA in molecular and cell biology (MCB) from the University of California Berkeley and has received his Doctor of Pharmacy from Touro University California. Dr. Tadesse is an advanced practice pharmacist who delivers patient centered care service per collaborative practice agreement in a clinical setting. Furthermore, Dr. Tadesse also holds a diabetic specialty that helps him treat complex diabetic patients. He uses his extended training to treat patients with chronic disease such as hypertension, diabetes, hyperlipidemia, anticoagulation, depression/anxiety, and safe medication use in geriatric population. Dr. Tadesse makes every effort to provide high standard and quality patient centered care services for his patients.
